StarlettePlus-E

Refrigeration dryer series

The Parker Hiross StarlettePlus-E series of refrigerated dryers (SPE) is the perfect solution for efficient removal of water vapour from compressed air and combines quality and efficiency in a reliable design with the smallest impact on the environment and on the operating costs. Developed around a state-of-the-art Aluminium heat exchanger (E-Pack), with a patent pending all-in-one design, featuring an air-to-air section, an air-to-refrigerant section, a highly efficient stainless steel demister separator and a moisture collection chamber, the new StarlettePlus-E series provides a ISO 8573-1 class 4 air quality as standard with unrivalled running costs.

Thanks to the highly efficient E-Pack design, the refrigerant circuit absorbs lower power and uses less refrigerant charges than other comparable dryer, making StarlettePlus-E the range in the market with the lowest running costs and the smallest impact on the environment. All models are equipped as standard with a digital controller that provides features useful in the day-by-day operations of any application: dew point level indication, free voltage alarm contact, maintenance reminder and integral timed drain control. In addition, thanks to its dual frequency design, StarlettePlus-E is ready to operate either in 50Hz or 60Hz environments.

A StarlettePlus-E version, equipped with the Energy Save feature, is optionally available for the models from 2.6 m³/min (SPE026 - SPE062). When equipped with this feature, the SPE models will save additional energy at partial load by cycling the fridge compressor activity while cooling the inlet air using the cold reserve stored in the E-Pack mass.

Removable panels and internal component disposition makes service inspections and maintenance activity a simple task. A pass-through drain niche is also available on all SPE models, allowing easy access to the drain from both sides of the dryer without opening the unit and in particular when it is installed next to a wall or even hung on a wall, thanks to the ready available hanging points (up to model SPE018).

ENGINEERING YOUR SUCCESS.

StarlettePlus-E

Refrigeration dryer series

Key Benefits:

- The range with the lowest Carbon Footprint on the market
- The lowest running costs and the lowest absorbed power in this range
- High efficiency all-in-one Aluminium Heat Exchanger ("E-Pack", patent pending)
- Minimum refrigerant charges (avg. 25% lower than comparable ranges)
- Dual-Frequency ready for 50 or 60Hz applications
- Digital controller with embedded features:
 - Free contact
 - Maintenance reminder
 - Drain control (timed mode)
- Wall-hang ready (up to model SPE018)
- Easy drain access from both sides
- Compact dimensions

Key Applications:

- Industrial and general air applications requiring a dew point as low as 3 °C (ISO 8573-1:2010, class 4).
E.g.:
 - Manufacturing
 - Automotive
 - Textile, Wood, Glass industry
 - Surface treatment
 - Materials handling
 - Material forming
 - Mining
- With proper filtration stages, also more demanding applications (still with class 4 min. pdp) may benefit from using the SPE fridge dryer family

Scope of supply:

StarlettePlus-E dryer – supplied ready for installation with:

- Digital Controller
- Voltage Free alarm contact
- Maintenance reminder
- Integral timed drain
- Dual frequency 50 / 60 Hz ready

Optional:

- External Float or Electronic Capacitive Drain
- Energy Saving versions (from model SPE026)
- Pre-filter and By-pass kits on request

A pass-through drain niche allows easy drain access from both sides

Equipped with digital controller

Optional pre-filter (not part of the standard scope of supply).

Dimensions and weight

Performances refer to air at FAD 20 °C / 1 bar A, and at the following operating conditions: 50Hz air suction 25 °C / 60 % RH, 7 bar_g working pressure, 25 °C cooling air temperature, 35 °C compressed air inlet temperature and class 4 pressure dewpoint in accordance with ISO8573-1. All indicated data refers to DIN ISO 7183. All models supplied with refrigerant R134a.

Air quality classes, in accordance with ISO 8573-1:2010

Humidity (gaseous)	Class 4 at std ISO conditions
--------------------	-------------------------------

Operating range

Site Selection	Frost-free indoor installation in a non-hazardous environment
Ambient Temperature	5 to 50 °C
Compressed air inlet temperature	5 to 65 °C
Operating pressure range	2 to 16 bar _g – SPE004-062;
Medium	Compressed air and gaseous nitrogen

Electrical connections

Mains Voltages	230V, 1-phase, 50 Hz and 60Hz (dual frequency ready)
Protection class	IP22

Materials of construction

Heat Exchanger fridge section	All-in-one "E-Pack" Aluminium heat exchanger with Stainless Steel demister
Refrigerant fluid	R134a

Pressure vessel approvals

EU	Approval for fluid group 2 in accordance with the Pressure Equipment Directive 97/23/EC
----	---

Quality assurance

Development/Manufacturing	ISO 9001, ISO 14001, OHSAS 18001

StarlettePlus-E

Refrigeration dryer series

Correction factors for SPE model selection at 50Hz

Inlet Temperature (°C)	30	35	40	45	50	55	60	65
Correction Factor CFIT	0,81	1	1,20	1,47	1,75	2,13	2,27	2,38
Working Pressure (bar _g)	3	5	7	9	11	13	15	16
Correction Factor CFP	1,37	1,11	1	0,93	0,89	0,87	0,85	0,84
Ambient Temperature (°C)	20	25	30	35	40	45	50	
Correction Factor CFAT	0,94	1	1,08	1,14	1,22	1,33	1,43	
Pressure Dew Point (°C)	+3	+5	+7					
Correction Factor CFD	1	0,90	0,81					

Calculate Minimum Drying Capacity =
System Flow x CFIT x CFAT x CFP x CFD and select dryer from table above

Example: air flow 190 m³/h, operating pressure 9bar_g, 40 °C inlet T, 30 °C ambient T, at 3 °C pdp

- 1) Find the correction factors above: 9 bar_g = 0,93; 40 °C inlet = 1,20 ; 30 °C ambient = 1,08; 3 °C pdp = 1
- 2) Calculate the required capacity: 0,93 x 1,20 x 1,08 x 1 = 1,21; 190 x 1,21 = 230 m³/h; 230/60 = 3,8 m³/min
- 3) Select the model with the closest nominal capacity: model **SPE040**

Product Key

Series	Flow *10 (m³/min)	Condenser	Electrical Voltage, phase, Dual-Frequency	Max Operating Pressure (bar _g)	Drain Type	Plug Type	Energy Saving version
SPE	004 to 062	A	230 1 DF	16	TI, EX or FH	S	-
SPE	026 to 062	A	230 1 DF	16	EX	S	ES ⁽¹⁾

⁽¹⁾Option available only from model SPE026

Examples

SPE	014	A	2301DF	16	TI	S	
SPE model for 1,4 m³/min, air cooled, 230 V, 1-phase, dual-frequency 50/60 Hz power supply, max 16 bar _g operating pressure, equipped with integral timed-drain, Schuko plug							
SPE	052	A	2301DF	16	EX	S	
SPE model for 5,2 m³/min, air cooled, 230 V, 1-phase, dual-frequency 50/ 60 Hz power supply, max 16 bar _g operating pressure, equipped with external electronic capacitive drain, Schuko plug							
SPE	052	A	2301DF	16	FH	S	
SPE model for 5,2 m³/min, air cooled, 230 V, 1-phase, dual-frequency 50/60 Hz power supply, max 16 bar _g operating pressure, equipped with external float drain, Schuko plug							
SPE	040	A	2301DF	16	EX	ES	S
SPE model for 4,0 m³/min, air cooled, 230 V, 1-phase, dual-frequency 50/60 Hz power supply, max 16 bar _g operating pressure, equipped with external capacity drain, Energy Saving model version, Schuko plug
